SONAE 
ARAUCO
Taking wood further

Touch is the eye's soul.

It takes you one dimension further. A dimension your eyes cannot fully apprehend. One's touch is the emotional need to validate what the rest of your senses perceive. Warm or cold, harsh or soft, comfortable or not, to touch is to establish a physical contact with the world.

Le toucher est le regard de l'âme.

Il nous conduit à une dimension que nos yeux, seuls, ne parviennent pas à percevoir. Nous touchons car nous devons valider les émotions que nos autres sens perçoivent. Froid ou chaud, rêche ou doux, confortable ou non, toucher c'est établir un contact physique avec le monde.

Stucco

[STU]

Close your eyes. Touch.

Feel the light roughness of cement mixed with the softness of the ceramic. Experiment the cracks, unevenness of the surface and the story it tells.

Now open your eyes. See.

Observe the nuances, the detail of each surface and realize how hands and eyes share their information.

This is the Stucco experience.

Fermez les yeux. Touchez.

Sentez la légère rugosité du ciment mélangé à la douceur de la céramique. Testez les fentes, les dénivellations de la surface et l'histoire qu'elle raconte.

Maintenant, ouvrez les yeux. Regardez.

Observez les nuances, les détails de la surface et constatez comment les mains et les yeux partagent l'information.

Telle est l'expérience Stucco.

Space of pure joy.
*Un espace
de pur bien-être.*

Fusion

(FUN)

Close your eyes. Touch.

Feel the warmth of the surface and the soft, almost velvety touch of the pores. This could be fabric.

Now open your eyes. See.

It's wood! It looks like live, handcrafted wood, with its various colour nuances and sheen degrees.

That's why we call it Fusion.

Fermez les yeux. Touchez.

Sentez la chaleur de la surface et le toucher doux et velouté des pores. Cela pourrait presque être du tissu.

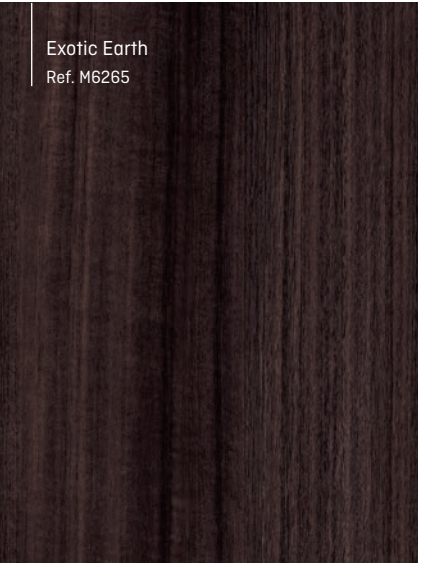

Maintenant, ouvrez les yeux. Regardez.

C'est du bois ! On dirait du bois vivant et travaillé à la main avec ses nuances de tons et de brillances.

C'est pourquoi nous le nommons Fusion.
